JBIS journal of the british interplanetary society

VOLUME 36 1983

EDITORS

ASTRONAUTICS HISTORY	M. R. SHARPE
INFRARED ASTRONOMICAL SATELLITE	DR. R. HOLDAWAY
INTERSTELLAR STUDIES	DR. A. R. MARTIN
SOVIET ASTRONAUTICS	A. WILSON
SPACE CHRONICLE	A. WILSON
SPACE TECHNOLOGY	A. WILSON

Published by THE BRITISH INTERPLANETARY SOCIETY LTD., (No. 402498). Registered Office: 27/29 South Lambeth Road, London, SW8 1SZ, England. *Copyright ©1983. All rights reserved. AUTHOR INDEX

Bainbridge, W. S.	Attitudes Towards Interstellar Communication: An Empirical Study	298
Becklake, E. J. *et al*	The Science Museum's Cunningham Lifesaving Rocket	555
Bevan, H. C. *et al*	The IRAS Ground Station and Operations Control Centre at Chilton	10
Birch, P.	Orbital Ring Systems and Jacob's Ladders – II	115
"	Orbital Ring Systems and Jacob's Ladders – III	231
Borrowman, G. L.	Operation Morninglight: Conclusions	92
Cathcart, R. B.	A Megastructural End to Geologic Time	291
Clarke, P. S.	Aspects of the Soviet Photoreconnaissance Satellite Programme	169
"	Soviet Spacecraft Recoveries	186
"	The Soviet Space Year of 1982	249
"	The Evolution of the Soyuz Programme	434
Clegg, P. E.	Scientific Objectives of IRAS	3
Corso, G. J.	A Proposal to Use an Upper Atmosphere Satellite Tethered to the Space Shuttle for the Collection of Micro-Meteoric Material	403
Crowe, D. G.	Laser Induced Pair Production as a Matter-Antimatter Source	507
Cruz, M. I.	Aerocapture and Aeroassisted Orbit Transfer – A High Performance Leverage Space Technology	395
Duxbury, J. H.	US Data Processing for the IRAS Project	43
Fowler, M. J. F.	Life Science Research On-Board Spacelab (Part 1)	243
"	Life Science Research On-Board Spacelab (Part 2)	345
Freitas, R. A.	Terraforming Mars and Venus Using Machine Self-Replicating Systems (SRS)	139
"	The Case for Interstellar Probes	490
"	Extraterrestrial Intelligence in the Solar System: Resolving the Fermi Paradox	496
"	The Search for Extraterrestrial Artifacts (SETA)	501
Froning, H. D.	Requirements for Rapid Transport to the Further Stars	227
Gillett, P. R. C.	ERS-1: An Ice and Ocean Monitoring System	387
Goddard, R. H.	The Ultimate Migration	552
Griffiths, J. S.	Astronomical Notebook	166
Haesler, D.	Soviet Manned Space Flight Hardware	461
Hall, R.	The Soviet Cosmonaut Team, 1960-1971	468
"	The Soviet Cosmonaut Team, 1971-1983	474
Hallion, R. P.	The Path to the Space Shuttle: The Evolution of Lifting Reentry Technology	523
Hoff, H. A.	Exosat – The New Extrasolar X-ray Observatory	363
Holloway, P. F.	Space Station Technology	409
Irace, W. and Rosing, D.	The IRAS Telescope	27
Johnson, N. L.	Artificial Satellite Break-Ups (Part 1)	51
"	Artificial Satellite Break-Ups (Part 2)	357
Kenden, A.	Was "Columbia" Photographed by a KH-11?	73
"	Military Manoeuvres in Synchronous Orbit	88
Kerridge, S. J.	The Voyager Mission to Uranus and Beyond	339
Kidger, N.	Salyut Mission Report	163, 275, 452
Lovelace, U. M. and Wright, R. L.	A Concept for Global Crop Forecasting	59
Lunan, D.	Nuclear Waste Disposal in Space	147
"	Project Starseed: An Integrated Programme for Nuclear Waste Disposal and Space Solar Energy	426
Maley, P. D.	Reflection Characteristics of Certain Classes of Soviet Space Objects	81
Martin, A. R.	Computer Programs and *JBIS* Interstellar Studies – Some Guidelines for Submission	331
"	A Delphi Experiment on Mankind's Interstellar Future	509
Martin, A. R. and Bond, A.	Is Mankind Unique?	223
Matloff, G. L.	Beyond the Thousand-Year Ark: Further Study of Non-Nuclear Interstellar Flight	483
Matloff, G. L. and Mallove, E.	The Interstellar Solar Sail – Optimization and Further Analysis	201

McLaughlin, W. I.	Pathways of Evolution for Man and Machine	215
Morgan, W. L.	Geosynchronous Satellite List: 1983	377
Moss, P. R.	The Development of Global Satellite Telecommunications	66
Mount, K. E.	Ground Operations Software at the IRAS Operations Control Centre	34
Nussinov, M. D. and Lysenko, S. V.	Space Vacuum Hinders Radiopanspermia	195
Ordway, F. I. and Winter, F. H.	Pioneering Commercial Rocketry in the United States of America, Reaction Motors, Inc. 1941-1958, Part 1: Corporate History	542
Papagiannis, M. D.	Search for Extraterrestrial Life – A New Commission of the IAU	305
Paprotny, Z. and Lehmann, J.	Interstellar Travel and Communication Bibliography: 1982 Update	311
Peebles. C. L.	Air Launched Shuttle Concepts	153
Pouw, A.	The IRAS Spacecraft	17
Powell, J. W.	ASSET and PRIME: Gliding Reentry Test Vehicles	369
"	Soviet Space Science	454
Pryke, I. and Stimson, A.	Report on the AIAA Biennal Space Systems Conference, October 1982	158
Rees, R. T. and Vick, C. P.	Soviet Nuclear Powered Satellites	457
Robinett, K. H.	Proprietary Data vs. NASA's Need to Know	263
Sargent, P. M. and Derby, B.	Choice of Lunar Materials as Determined by Fabrication Methods	279
Sharpe, M. R.	A Note on the Development of the English Lifesaving Rocket in the 19th Century	559
Sheldon, E.	Evaluation of Characteristic Parameters for Schwarzchild, Extreme Kerr and Hawking Black Holes	130
Sheldon, E. and Giles, R. H.	Celestial Views from Nonrelativistic and Relativistic Interstellar Spacecraft	99
Stephenson, D. G.	Comets and Interstellar Travel	210
Thomas, G. R.	IRAS Preliminary Science Analysis at the OCC	38
Van Holtz, R. C.	The IRAS Project Organisation and Mission Operations	6
Von Puttkamer, J.	Roles and Needs of Man in Space	351
Wildeman, K. J. *et al*	The Dutch Scientific Instrument On Board IRAS	21
Wilson, K. T.	Rangers 3-5: America's First Lunar Landing Attempts	265
Zito, P. R.	Chain Reactions in a Hydrogen-Antiproton Pile	308

FEATURES

Book Reviews 93, 288, 425, 562
Correspondence 96, 142, 191, 286, 335, 383, 467, 518
Highlights of NASA's 1982 Space Activities 157
Recent Archaeoastronomical Finds in the United States 277
SETI News and Views 239
Tracks of the Planets 185

SUBJECT INDEX

Aerocapture 394
AIAA 158

Bibliography 311
Black Holes 130

Comets 210
Communications 66, 298, 311
Computers 311

Delphi Experiment 509

Evolution 215

IAU 305
Interstellar
  Probes 490
  Travel 99, 201, 210, 227, 311, 483, 490, 553

Lasers 507
Life Sciences 243, 345
Lifesaving Rockets 555
Lunar Construction 279

Man in Space 351
Micrometeorites 403
Military 88

Nuclear Reactions 308, 507
Nuclear Waste 147, 383, 426

Orbit Transfer 394
Orbital Ring Systems 115, 231

Radio Panspermia 195
Ranger Project 265
Reaction Motors, Inc 542
Reentry Vehicles 369, 523

Satellites
- ERS 387
- Exosat 363
- Geosynchronous 377
- IRAS 3, 6, 10, 17, 21, 27, 34, 38, 43
- Kosmos 954 92
- Military 88
- Nuclear Powered 457
- Reconnaissance 169, 457
- Soviet 51, 81, 454, 457
- Tethered 403

SETI 223, 239, 298, 305, 311, 496, 501

Shuttle
- Air Launched 153
- Technology Development 523
- Tethered Satellite 403

Solar Sails 201
Soviet
- Cosmonauts 468, 474
- Kosmos 954 92
- Nuclear-Powered Satellites 457
- Reconnaissance 169
- Salyut 163, 275, 452, 461
- Satellite Break Ups 51, 357
- Satellite Reflection Characteristics 81
- Soyuz 434
- Space Science 454
- Spacecraft Recoveries 186
- Year 1982 249

Spacelab 243, 345
Space Solar Energy 426
Space Stations 409

Terraforming 139

Voyager 339
